

Subject: Application for Software Engineer - Service Monetization Team | Sahil Kalathiya

Dear Hiring Manager,

I am writing to express my strong interest in the Software Engineer position on the Service Monetization Team at Crunchyroll. Having recently returned to India from Canada, I am actively seeking new opportunities where I can leverage my robust backend background and passion for scalable architecture. Crunchyroll's mission to connect millions of anime fans globally resonates strongly with me, and I am excited about the prospect of optimizing your core subscriptions and payments platform.

Throughout my engineering career, I have specialized in architecting resilient server-side systems and highly efficient RESTful APIs. At TechSmith Solutions, I focused on high-throughput backend services primarily using **Java**, consistently optimizing database operations and reducing system latency. My experience extends to cloud-native infrastructures on **AWS and GCP**, ensuring high availability and seamless scalability. At Alorica, I led real-time problem-solving for enterprise applications, driving efficient data tracking and critical system troubleshooting.

In addition to my core software engineering background, I have hands-on experience designing and deploying production-ready AI solutions. Notably, I engineered an intelligent query system using **Python** and **Node.js**, leveraging **Retrieval-Augmented Generation (RAG)**, **LangChain**, and **FastAPI**. This project involved constructing efficient vector search retrieval pipelines, building performant REST endpoints, and integrating LLM orchestration to deliver fast, accurate responses. I am eager to bring this blend of backend expertise, cloud proficiency, and modern AI development to shape the future of Crunchyroll's monetization platform.

I am confident that my technical skills in backend architecture, microservices, and AI integrations align well with the demands of your engineering team. I look forward to the opportunity to discuss how my experience and fresh perspective can support Crunchyroll's continued growth and success.

Sincerely,
Sahil Kalathiya
