

Sahil Kalathiya

8200595195 | sahilkalathiya0120@gmail.com | Surat, GJ

Summary

Dynamic problem-solver with a strong analytical mindset, committed to delivering high-quality backend code that meets demanding development objectives within tight deadlines. Proven ability to navigate complex challenges and devise innovative solutions that enhance project outcomes. Passionate about leveraging technical expertise to contribute to team success and drive impactful results.

Experience

Alorica | Montreal, QC

Technical Support Engineer | 06/2024 - 07/2026

- Directed real-time problem-solving for enterprise banking application access, addressing complex issues promptly.
- Oversaw logging of application failures, ensuring accurate data tracking and improving cross-functional communication.
- Provided technical support to colleagues and assisted peers in effective troubleshooting methods.
- Coached teams using operational performance insights to reduce re-offense rates and enhance overall efficiency.

TechSmith Solutions | Ahmedabad, GJ

Java Backend Developer Intern | 12/2020 - 04/2021

- Developed and maintained RESTful APIs for a waste management application, ensuring secure and well-documented endpoints.
- Launched routing module leveraging Dijkstra's algorithm, achieving a 30% reduction in logistics latency.
- Normalized MySQL database schemas, significantly decreasing data redundancy and enhancing performance times.
- Implemented unit testing with JUnit, ensuring 95% code coverage for robust software reliability.
- Administered continuous integration processes using Apache Maven and managed version control through Git.

Skills

Python, TypeScript, NestJs, FastAPI, LangChain, RAG, LLMs, Vector Databases, MongoDB, PostgreSQL, pgvector, Redis, BullMQ, Github, Docker, AWS (IAM, EC2, S3, RDS), Microservices, REST APIs, System Design, Algorithm Design, Data Structures

Education

Concordia University | Montreal, QC

Master of Applied Computer Science | 08/2023

- Graduated with GPA: 3.92/4.3

Dharmsinh Desai Institute of Technology | Nadiad, GJ

Bachelor of Technology | 04/2021

- Graduated with GPA: 8.52/10

Projects

Enterprise Intelligent Knowledge Engine

- Architected a scalable, dual-engine microservices backend using NestJS and Python to securely process, embed, and query unstructured enterprise data.
- Implemented a production-ready Retrieval-Augmented Generation (RAG) pipeline utilizing LangChain and pgvector, reducing LLM token costs through strategic Redis caching layers.
- Engineered an asynchronous, event-driven document ingestion workflow using BullMQ and Redis to manage system backpressure during heavy mathematical AI embedding workloads.
- Hardened the API gateway infrastructure by integrating Helmet, strict CORS policies, and global rate-limiting, and deployed the fully containerized ecosystem via Docker Compose.
